NOTICE

The Society of Cable Telecommunications Engineers (SCTE) Standards and Operational Practices (hereafter called “documents”) are intended to serve the public interest by providing specifications, test methods and procedures that promote uniformity of product, interoperability, interchangeability, best practices, and the long term reliability of broadband communications facilities. These documents shall not in any way preclude any member or non-member of SCTE from manufacturing or selling products not conforming to such documents, nor shall the existence of such standards preclude their voluntary use by those other than SCTE members.

SCTE assumes no obligations or liability whatsoever to any party who may adopt the documents. Such adopting party assumes all risks associated with adoption of these documents and accepts full responsibility for any damage and/or claims arising from the adoption of such documents.

NOTE: The user’s attention is called to the possibility that compliance with this document may require the use of an invention covered by patent rights. By publication of this document, no position is taken with respect to the validity of any such claim(s) or of any patent rights in connection therewith. If a patent holder has filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license, then details may be obtained from the standards developer. SCTE shall not be responsible for identifying patents for which a license may be required or for conducting inquiries into the legal validity or scope of those patents that are brought to its attention.

Patent holders who believe that they hold patents which are essential to the implementation of this document have been requested to provide information about those patents and any related licensing terms and conditions. Any such declarations made before or after publication of this document are available on the SCTE web site at https://scte.org.

DOCUMENT RELEASE HISTORY 3
1. SCOPE 5
2. COPYRIGHT 5
3. NORMATIVE REFERENCE 5
4. INFORMATIVE REFERENCE 5
5. TERMS AND DEFINITIONS 5
6. REQUIREMENTS 5
1. **Scope**  
   This document is identical to SCTE 37 2010 except for informative components which may have been updated such as the title page, NOTICE text, headers and footers. No normative changes have been made to this document.  
   
   This document provides the branch object identifiers for each of the MIBs within the SCTE HMS Tree. This document has been revised; see the Description in the syntax.

2. **Copyright**  
   The MIB definition found in this document may be incorporated directly in products without further permission from the copyright owner, SCTE.

3. **Normative Reference**  
   IETF RFC 2578 SNMPv2-SMI  
   IETF RFC 1155  
   SCTE 36

4. **Informative Reference**  
   None

5. **Terms and Definitions**  
   This document defines the following terms:  
   
   **Management Information Base (MIB)** - the specification of information in a manner that allows standard access through a network management protocol.

6. **Requirements**  
   This section defines the mandatory syntax of the SCTE-HMS-ROOTS MIB. It follows the IETF Simple Network Management Protocol (SNMP) for defining the managed objects.  
   
   The syntax is given below.
SCTE-HMS-ROOTS DEFINITIONS ::= BEGIN

IMPORTS
  MODULE-IDENTITY
    FROM SNMPv2-SMI

scteRoot, scteHmsTree
    FROM SCTE-ROOT;

  LAST-UPDATED "201002011455Z"  -- Feb 1, 2010
  ORGANIZATION "SCTE HMS Working Group"
  CONTACT-INFO
    "SCTE HMS Subcommittee, Chairman
     mailto: standards@SCTE.org"

  DESCRIPTION
    "This MIB module is defining objects under the SCTE HMS tree."

  REVISION "201002011455Z"  -- Feb 1, 2010
  DESCRIPTION
    "1. Fixed spelling of the word (auxiliary).
      2. Detailed Description of Module Identity Change:
      The Module Identity for ::= { scteHmsTree 0 } is already being
      used in SCTE 84-1 [heCommonTrapPrefix ::= {scteHmsTree 0}]. This is
      the OID that defines HMS Traps, and cannot be changed without causing
      existing programs that handle traps to change. In order to avoid the
      duplicate definition this module identity becomes scteRoot (2). There
      will be no change for existing applications that have implemented this
      mib."

  REVISION "200904210000Z"  -- April 21, 2009
  DESCRIPTION
    "Changed Module Identity definition."

  REVISION "200803040000Z"  -- March 04, 2008
  DESCRIPTION
    "Updated the revision information of the file"

  REVISION "200802040000Z"  -- Feb 04, 2008
  DESCRIPTION
"Modified with comments from Meeting 1-11-08
1. Removed import of enterprises and OBJECT-TYPE which was never used.
3. Standard Module Identity was added since released version."

REVISION "200708150000Z" -- Aug 15, 2007
DESCRIPTION
"Added Multi Media to the list "

REVISION "200705261730Z" -- May 26, 2007
DESCRIPTION
"Added voipIdent to the list."
